

Environmental Policy

A2SEA is committed to protecting the environment and reducing the environmental impact of our activities - this is reflected in our focus on the environmental aspects of managing our business.

We aim to continuously reduce emissions and avoid harming the environment through the efficient use of resources, using materials that have a minimal environmental impact and by enforcing responsible disposal practices.

We will continuously assess the adoption of procedures and actions that can be used to further increase the efficiency of vessel operations and improve cost-effective utilisation of energy and natural resources.

Our objectives shall be to:

- Manage our activities in compliance with all applicable national and international laws and regulations as well as the DS/EN ISO14001:2004 standard.
- Identify and manage the significant environmental aspects and risks associated with our activities.
- Endeavour to use environmentally responsible practices in our activities, put into practice appropriate monitoring programs, and set and review objectives and targets to monitor the improvements.
- Endeavour to reduce the environmental impact of our activities by efficient use of resources, avoidance of materials with significant environmental impacts and by employment of responsible disposal practices.
- Follow the developments of technologies for environmental improvement relevant to the business and, where feasible, put into practice innovative improvement solutions, internally and in cooperation with external partners.
- Ensure that awareness and respect for the environment is an integral part of the company's daily life through education and continuous improvement of the competence of employees, both at sea and ashore.
- Committing ourselves to lead by example and positively influencing external partners, contractors and suppliers.

Fredericia, July 2017

Michael Glavind, CEO
